

Excellence in Medical Imaging Solutions

Transforming images into information.
Turning information into knowledge.
Mapping Life Pixel by Pixel.™

ICON Medical Imaging Overview

ICON Medical Imaging, formerly Beacon Bioscience, provides medical imaging solutions for clinical trials to the pharmaceutical, biotech and medical device industries around the globe. The use of medical imaging can enhance and support clinical trials, and expand the methods used to acquire biological information, thereby maximizing results. We ensure that imaging is successfully integrated into clinical trial design, implementation and analysis.

Our vast therapeutic and diagnostic experience includes, but is not limited to Oncology, Cardiology, Neurology, Rheumatology, diagnostic contrast imaging agents and medical devices utilizing data from CT, MRI, SPECT, PET, Ultrasound, X-Ray and other imaging modalities. ICON Medical Imaging will accelerate the development of your product through innovative trial designs, integrated informatics and expert project management. Our SOPs, training, attention to detail and clear communication benefit our clients every step in their trial, from study design to post-submission product support.

Synergy

ICON Medical Imaging offers the ultimate synergy. As a global organization ICON Plc is represented by 6,700 people in 71 ICON offices in 38 countries. Through ICON Medical Imaging's integrated data platforms with ICON Clinical and ICON Central Laboratories, you have access to paramount integrated service including data management, statistics, monitoring, site selection and integrated reporting.

ICON Medical Imaging provides a complete solution for your needs!

Why Choose ICON Medical Imaging?

ICON Medical Imaging's senior staff has been continuously active in imaging for drug development for more than 20 years, pioneering methods, procedures and regulatory guidelines over the evolution of today's standards. This history represents hundreds of trials with imaging endpoints. However, due to the dynamic nature of drug development including regulatory guidelines, changing personnel, technology and globalization, we strongly believe that only recent experience actually matters.

ICON Medical Imaging's Recent Experience Includes:

- Involvement in over 300 studies conducted in over 60 countries
- Maintenance of imaging review systems at FDA
- Delivery of 20+ NDA/BLAs

Electronic Adjudication Solution:

ICON Medical Imaging has created an Electronic Adjudication Solution for your Clinical Endpoint Committee (CEC) or Data Safety Monitoring Boards (DSMB) unique requirements. The advantages of our Adjudication Solution include:

- Elimination of the need for copying, overnight couriering and tracking of paper and film data
- Significant reductions in data loss
- Reliable, secure audit trails
- Enhancement of committee function due to superior organization of data
- Improved ability to track your study's progress and meet your strict guidelines
- Lower costs with MIRA's™ ability to interface directly with various EDC systems as well as programmed SAS input
- Secure remote access to ICON Medical Imaging's MIRA™ system

ICON Medical Imaging Delivers Results

Delivery begins with precise and thorough analysis of image data which provides our sponsors with:

- Sophisticated 3D volumes
- Measurements of metabolic changes
- Measurements of physiological changes
- Rigorous blinded read designs
- Electronic case report forms collecting data with built-in logical checks
- Access to worldwide blinded read facilities
- Stringent quality checks throughout the process
- Integrated image databases
- Permanent archives to our clients or regulatory authorities
