

Excellence in Medical Imaging Solutions

Transforming images into information.
Turning information into knowledge.
Mapping Life Pixel by Pixel.™

ICON Medical Imaging Overview

ICON Medical Imaging, formerly Beacon Bioscience, provides medical imaging solutions for clinical trials to the pharmaceutical, biotech and medical device industries around the globe. The use of medical imaging can enhance and support clinical trials, and expand the methods used to acquire biological information, thereby maximizing results. We ensure that imaging is successfully integrated into clinical trial design, implementation and analysis.

ICON Medical Imaging will accelerate the development of your product through innovative trial designs, integrated informatics and expert project management. Our SOPs, training, attention to detail and clear communication benefit our clients every step in their trial, from study design to post-submission product support.

Why Choose ICON Medical Imaging?

ICON Medical Imaging's senior staff has been continuously active in imaging for drug development for more than 20 years, pioneering methods, procedures and regulatory guidelines over the evolution of today's standards. This history represents hundreds of trials with imaging endpoints. ICON Medical Imaging's goal is to provide its clients with quality results each and every time. ICON Medical Imaging is constantly updating its industry-leading technology, adding key opinion leaders and further educating our staff to ensure that we provide our customers with the highest level of service possible.

ICON Medical Imaging's Complete Service Offering Includes:

- Medical Imaging Core Laboratory Services for Efficacy and / or Safety Endpoints
- Full-Service Solution for Diagnostic Contrast Agents and Imaging Device Trials
- Electronic Solutions for Safety, Endpoint and Adjudication Committees

Superior Technology

ICON Medical Imaging provides industry-leading image management, the fastest blinded read set up in the industry and a complete image based knowledge management system all designed to empower the sponsor with access to critical information anywhere, anytime. ICON Medical Imaging works in a wholly validated, 21 CFR Part 11, GCP compliant environment.

MIRA™ (Medical Image Review and Analysis), is our proprietary data and project management system that is utilized to track all site performance metrics, image and clinical data collection, image processing and QC, blinded reads and project management activities. This is the application our project teams work within and it provides our sponsors study team with 24/7 access to project metrics and the images themselves.

ICOSpeedRead is our complete Independent Review System for standard RECIST based oncology trials that includes a complete Independent Review Charter, validated eCRF, data delivery specification and reader training ready to implement in as little as two weeks.

Experienced People

Since 1990, ICON Medical Imaging's senior leadership has provided consistent performance and innovation in the field of medical imaging for clinical research, providing global excellence in Phase I – IV core laboratory services for pharmaceutical, biotechnology and medical device companies. The members of ICON Medical Imaging's management team are pioneers in the use of imaging technologies in drug development. ICON Medical Imaging's management provides experience, a solid fluid foundation, broad complimentary business skills, a successful track record and clear vision for the advancement of a new business model based on medical imaging.

Advanced Science

Dedicated to the success of every trial utilizing imaging endpoints, ICON Medical Imaging provides personal, one-on-one interaction and consulting on the critical uses of imaging in your trials, including the medical, scientific and regulatory aspects. Our people are imaging experts, with deep clinical and scientific roots. ICON Medical Imaging works with sites and clients to solve problems before they become rate limiting issues.

ISO 9001:2000 Certification

ISO 9001:2000 certification is rarely seen among imaging-focused CROs, thereby further strengthening ICON Medical Imaging's leading position in the marketplace. This certification indicates that our Quality Management System is designed to meet the needs of our clients. Our ISO 9001:2000 certification recognizes ICON Medical Imaging's ongoing commitment to quality, reliability and continual improvement of all processes and maintaining transparency for better customer satisfaction.
